## ABOUT ME

---

Software Engineer with 4 years of hands-on experience in front-end and back-end development. Interested in startups that create awesome products.

## EXPERIENCE

---

### Senior Software Engineer

Accenture

Argentina

2021 - Present

- Refactored the back-end architecture of the API by implementing modular file structures and reusable functions; achieved a 30% improvement in response time while ensuring maintainability for 3+ developers.
- Architected a back-end solution for an AI chatbot that conducted automated security audits on source code, leading to a 20% reduction in identified vulnerabilities and improving security protocols.
- Transformed the database management interface by designing a visually appealing layout and incorporating advanced filtering capabilities, enhancing overall productivity across the team.
- Executed a comprehensive review of API query structures, implementing best practices that led to a 20% enhancement in response times, enabling faster data processing for the chatbot utilized by 200+ users.
- Mentored two summer interns through onboarding, guiding the implementation of new API endpoints using OpenAI API.
- Developed an innovative platform that coordinated security solutions for 150+ web applications, improving incident response times by 40% and enhancing overall system reliability during high-traffic events.
- Created an intuitive front-end using NextJS and TailwindCSS, which improved the app's usability score on user feedback surveys, receiving a 90% satisfaction rate in the first quarter post-launch.
